PROFESSIONAL SUMMARY

Analytics professional with 7+ years translating data into measurable business outcomes across logistics, fintech, and agri-tech. Track record of cutting costs, improving data quality, and scaling analytics adoption. Expert in Snowflake SQL for deep-dive analysis and Power BI/Tableau for executive-to-frontline reporting. Proven ability to align technical solutions with business priorities, influence cross-functional stakeholders, and drive self-service analytics adoption that reduces analyst bottlenecks and accelerates decision-making.

SKILLS

BI & Analytics Tools: Power BI (Expert), Tableau, QlikSense, DAX, Power Fx

Databases & Platforms: Snowflake (Expert), SQL Server, Oracle

Data Tools: SQL, dbt, Excel, Access, Dataiku, Fivetran

Process & Governance: Agile/SCRUM (Jira/Confluence), Data Governance, Quality Assurance, Alation, Lean Six Sigma

PROFESSIONAL EXPERIENCE

YMX Logistics | Data Analyst

July 25 – Present

- Built Snowflake data architecture from the ground up using dbt for layered data modeling and automated testing, establishing governance and quality controls that enabled reliable self-service analytics and eliminated ad-hoc data requests from business units.
- Cut data warehousing costs by 50% through SQL optimization; identified and resolved critical pipeline failures that were directly blocking business operations and financial reporting.
- Strengthened data model integrity by coordinating cross-functional investigations and deploying Power BI metadata dashboards, reducing data quality incidents and rebuilding stakeholder confidence in reporting.
- Partnered with stakeholders to define and validate business metrics, accelerating user onboarding and driving measurable adoption of self-service analytics tools.

WEX INC | Risk Data Analyst

Nov 23 – July 25

- Delivered scalable Tableau dashboards and dbt-modeled data marts in partnership with Data Engineering, reducing time-to-insight for the risk team and enabling proactive portfolio monitoring.
- Surfaced risk exposure patterns, collections discrepancies, and fraud signals through advanced Snowflake SQL analysis, directly informing risk mitigation strategies and protecting revenue.
- Improved data literacy and analytical confidence across business teams by resolving data interpretation gaps; led Hypercare for new analytics releases, ensuring smooth adoption and immediate business value.
- Aligned business priorities with technical capacity by facilitating SCRUM ceremonies with cross-functional stakeholders, keeping the analytics roadmap on schedule and focused on highest-impact deliverables.

CMA CGM | BPM Specialist

Nov 21 – Nov 23

- Spearheaded Digital Transformation initiatives including QlikSense analytics deployments, improving operational visibility and enabling data-driven decision-making at the business unit level.
- Accelerated tool adoption by establishing best practices and coordinating advanced user training, expanding the analytics user community and reducing dependency on IT for reporting.
- Applied Lean Six Sigma to identify and eliminate operational inefficiencies, delivering measurable process improvements with direct impact on throughput and cost reduction.

SmartBreeder | Business Intelligence Analyst

Dec 19 – Nov 21

- Built and maintained a Power BI and SQL Server data warehouse, creating a single source of truth that underpinned strategic reporting and eliminated inconsistent data across business processes.
- Drove analytics adoption by delivering Power BI training to users at all skill levels, empowering business teams to independently answer data questions and reduce analyst bottlenecks.
- Accelerated product delivery by partnering with the product team on requirements gathering and UAT, ensuring new analytics features delivered business value from day one.

Cargill | Projects Intern

Jan 19 – Dec 19

- Delivered digital automation tools (VBA, Power BI, Power Apps) for internal departments, streamlining repetitive workflows and freeing team capacity for higher-value work.

EDUCATION

Agricultural Engineering – University of São Paulo (ESALQ)

Jan 15 – Dec 19

MBAs: IT Project Management (2024), Big Data & Analytics (2023), Logistics Management & Production Engineering (2023), Applied Data Science (2022), Business Intelligence (2021).
